### CG-6- Entrance Station Pathway Accessibility

**Issue:** Visitors with disabilities are relegated to using the heavily trafficked park entrance road when travelling from the kiosk area ADA parking to the entrance kiosk, and across to the Lakeside Interpretive Trail.

**Recommendation:** Reconfigure parking and pathways to provide ADA designated pathways from kiosk area accessible parking to the entrance station kiosk window and to the Lakeside Interpretive Trail.

### CG-1- Dog Beach Way Trails, Area

**Issue:** Numerous non-system trails throughout this area that impact park resources.  
**Recommendation:** Consolidate trails into one that is built to Department standards. Remove and rehabilitate all other alignments.

### CG-2- Pond Trails, Area

**Issue:** Numerous non-system routes throughout this area that impact park resources.  
**Recommendation:** Consolidate trails into one loop trail built to Department standards and designate hike / bike. Remove and rehabilitate all other alignments.

### CG-5- Splitrock Trail

**Issue:** Trail needed for connectivity, but unsustainable non-system route.  
**Recommendation:** Reroute and reengineer as necessary for sustainability and incorporate the trail into the park's trail system with hike and bike use designation.

### CG-4- Volunteer Trail off Coldstream Road

**Issue:** Heavily used volunteer trail that provides access to Coldstream Valley.  
**Recommendation:** Trail is currently sustainable. Name it the Coldstream Canyon Connector and incorporate into the park's trail system as a hike / bike trail.

### CG-3- Coldstream Valley Rd near Entrance

**Issue:** Popular trailhead with insufficient parking, particularly for horse trailers.  
**Recommendation:** Construct primitive parking area and staging area big enough for horse trailers.
