Mobile Boat-to-Boat Services

Mobile boat-to-boat services for bilge and sewage pumpout, steam cleaning and oil change provide an alternative to bilge sewage pumpouts and oil change services at fixed locations in marinas. There are numerous environmental benefits from these services when they are conducted appropriately, including using spill-proof oil extraction, soapless bilge cleaning, and proper waste management and disposal techniques. Where available, these services can be more convenient for boaters, since they may reduce the need to have boats hauled out for service, to bring boats to fixed facilities or to conduct their own maintenance and then transport the wastes to recycling or disposal facilities. Currently, the Delta is only being served by mobile sewage pumpout services.

DELTA MOBILE SEWAGE PUMPOUT SERVICES (Fee Involved, call ahead for fee service) Marine Service Corps. (415) 370-6812 www.marineservicecorps.com Email: marineservicecorps@yahoo.com Areas served: Alameda (Oakland Estuary and Emeryville). Septic Brothers. (209) 329-0768 www.septicbrothers.com Email: contact@septicbrothers.com or septicbrothers@yahoo.com Areas served: Contra Costa and San Joaquin Counties (Antioch Bridge through Walnut Grove).

MAP INTRODUCTION

The purpose of this map is to help boaters and the general public conveniently find environmental services within the central and southern areas of the Sacramento and San Joaquin Delta (Delta). These services are an important means of preventing pollution at its source to preserve and protect the Delta's water quality, so that everyone can continue to enjoy it for many generations. comprehensive map including all the marinas in the Delta. Some marinas are excluded due to lack of information, a request for anonymity, having a boat capacity of less than ten slips, or not being open to the general public.

The Delta, A Precious Resource

The Delta ecological system is the largest estuary on the Pacific Coast of the United States and is a critical center for many beneficial uses. both locally and for people throughout the state. The Delta is the physical hub of California's two largest water distribution systems, supplying drinking water to two-thirds of the state's population, irrigation water for over 7 million acres of farmland and supporting many recreational activities. The most popular recreational activities in the Delta are boating, fishing, leisure cruising, wake boarding, skiing, swimming and bird watching. The Delta is also home to hundreds of different wildlife species and is a part of the Pacific Flyway, providing critical habitat for thousands of migratory birds.

The population of the six counties adjoining the Delta (Alameda, Contra Costa, Sacramento, San Joaquin, Solano and Yolo) is expected to continue to increase over the coming years, with growing suburban development. Thus, the number of boaters recreating in the Delta is also expected to increase well beyond the Delta Counties' current level of 170,400 registered boaters.

To preserve the Delta's precious resources while accommodating its growing popularity with recreators, local marina operators and caring boaters are working with the Contra Costa County Public Works Department, Sacramento County Environmental Management Department, San Joaquin County Department of Public Works, Solano and Yolo Counties, City of Stockton, California Coastal Commission, and Department of Boating and Waterways to implement a marina and recreational boating program called "Keep the Delta Clean" (funded by the State Water Resources Control Board). The program uses education and pollution prevention services to preserve and protect water quality, opportunities for recreational activities and environmental health in the Delta. Please read below to learn more about how you can help keep the Delta safe and clean for all.

BOAT CLEANING & MAINTENANCE

The products you purchase to clean and maintain your boat can be harmful to aquatic life, water quality and human health. When you purchase boat cleaning products, check the labels for words such as "danger," "poison," "warning," or "caution" that indicate the toxicity of a

Use Less Toxic or Non-Toxic Cleaning Products Use non-phosphate, biodegradable cleaners.

Use more elbow grease and fewer cleaning products; scrub and rinse with freshwater after each trip.

Use canvas boat covers to keep your boat clean between trips and to reduce the amount of cleaning you need to do.

Spill-Proof Cleaning and Maintenance Activities Contain debris using tarps and then use a vacuum or broom to

Avoid doing boat maintenance on the docks or over the water.

Always mix paints, varnish, epoxy and other products over a tarp or in a drip pan to catch spills and drips. Keep absorbents nearby to wipe up spills.

Choose less toxic hull paints and anti-fouling strategies that include environmentally sound underwater hull cleaning

Combine the use of less toxic paints and bottom coatings with mechanical means (manual or power scrubbing) to control growth. Less toxic bottom coatings provide alternatives to

Talk to your boatyard operator or marine supply shop staff about less toxic alternatives.

soft sloughing paints that release heavy metals.

Take unused boat maintenance products (bottom paints, cleaning solvents and zinc anodes) back to shore and recycle or dispose properly at a Household Hazardous Waste Collection Center. (Household Hazardous Waste Disposal

locations are listed at the upper-right corner of this side of the

those that are old or unnecessary.

GRAY WATER

including antifreeze, lead-acid batteries, used oil and oil filters, oil/fuel saturated absorbents, solvents, paints, zincs, varnishes and cleaning products. The use of these products can sometimes result in spills

Oil, fuel and other petroleum products are considered to be toxic to human health and aquatic life. Help prevent pollutants from entering the Delta by practicing preventive engine maintenance and by using oil

Look on the opposite side of this map to find marinas with oil absorbent exchange programs $\mathring{\mathbf{t}}$ and certified used oil collection centers $\boldsymbol{\delta}$ Read below for more information on the oil absorbent exchange

Oil Absorbents

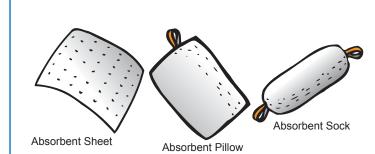

OIL AND FUEL

Use oil absorbents in the bilge to capture small leaks and drips from your engine. The absorbents will capture oil before the bilge pump discharges it into the water.

What is an Oil Absorbent?

Oil absorbents come in many shapes and sizes, such as sheets or pads, pillows and socks. They absorb oil while repelling water. Oil absorbents are the least expensive method that boaters can use to control oily discharge and soak up small oil spills. (It is illegal to use soaps or bilge cleaning products to dissipate an oil sheen on the water. Soaps, detergents and emulsifiers add more pollutants to the environment without removing the oil from the water.)

Oil Absorbent Sheets: Use flat absorbent sheets for oil drips under Contact your local garbage/recycling company. Some areas have the engine and in the bilge and to remove oil sheen on the water. Pads curbside used oil and filter collection services and special dropcan also be used while fueling your boat or when filling a portable fuel bottle to catch fuel spills at the filler fitting and air vent. Call (800) CLEANUP (253-2687) or visit www.earth911.org for

Absorbent Socks or Pillows in the Bilge: Socks and pillows are designed for use in deeper bilge compartments. Properly secure absorbents in the bilge. If you have an extremely oily bilge, consider using a bilge pumpout service and then a steam cleaning service that properly disposes of the wastewater.

PRECAUTIONS: When using absorbents in the bilge, secure them to prevent clogging or fouling the bilge pump and the bilge pump float or sensor. Oil and fuel are flammable. Keep oil and fuel saturated absorbents in a well-ventilated area, away from heat and sources of

Where Can I Get an Oil Absorbent? Absorbents are sold at marine supply stores and come in a variety of shapes and sizes, such as flat sheets, pillows, socks, booms and

Where Do I Dispose of Used Oil Absorbents? In California, absorbents saturated with oil are hazardous waste and should not be thrown in the garbage. You have various options for

properly disposing of your saturated absorbents: 1. Oil Absorbent Exchange Centers: This service is offered by marinas that are actively distributing and collecting oil absorbents for free as a way of reducing oil discharges from boats. (Marinas distributing and collecting oil absorbents on

an emergency basis are not considered to be participants in an Oil Absorbent Exchange Program.) Use this map to find marinas accepting saturated

absorbents. Look for the $\mathring{\mathbf{L}}$ on the map.

2. Ask your marina operator about local resources to properly dispose of saturated absorbents.

3. Call (800) CLEANUP (253-2687), or visit www.earth911.org to find hazardous waste disposal locations near you.

Preventive Engine Maintenance

BOAT SEWAGE practice preventive engine maintenance. Keep the engine well Over one hundred different intestinal pathogens such as viruses, tuned and operating efficiently. parasites and bacteria can be found in sewage that may harm

humans, wildlife and drinking water quality.

Look for on the map for marinas with sewage pumpout facilities or visit www.dbw.ca.gov/Pumpouts

It is illegal to discharge any sewage, treated or untreated, into the Sacramento-San Joaquin Delta (East of Chipps Island) as stated in the Clean Water Act. The entire Delta is considered a

rivers system that does not support interstate traffic [CFR § 33

Always use shoreside restrooms when docked and before casting off.

Visit a marina with a sewage pumpout and/or port-a-potty dump Visit a marina with a sewage pumpout and properly station to properly dispose of sewage. For assistance in properly perating a sewage pumpout, contact the marina operator or

approved Marine Sanitation Device (MSD) if operating in U.S.

that can be harmful to aquatic organisms. If you have a Y-valve with a through-hull fitting that allows direct overboard discharge, it must be secured in the closed position

TRASH AND MARINE DEBRIS Trash, fishing gear and debris in the water, and on levees and

quality of recreation in the Delta. Bring it all back. Designate a permanent on-board trash bin. Properly stash all containers and trash on board to prevent

beaches has detrimental effects on wildlife, boater safety, and on the

items from being blown overboard. Put empty cans and bottles back in your cooler to recycle

Remove product packaging at home or pack food from home in

REMEMBER! Reduce, Reuse and Recycle. Take used monofilament fishing line back to recycling bins at your marina or tackle shop, or send it directly to: Pure Fishing, 1900 18th Street, Spirit Lake, IA 51360-1099, (800) 237-5539.

a reusable container to eliminate packaging waste on board.

Participate in a local marina or beach cleanup—call (800) COAST4U (253-2687), or visit the California Coastal Commission Website at: www.coast4u.org.

NON-NATIVE AQUATIC SPECIES

Non-native aquatic plant and animal species are invading the Delta, clogging up channels, impacting recreation and displacing native species. Native Delta species must compete for habitat, often are prey to invaders and can be infected with foreign diseases. Once non-native species are introduced, they are nearly impossible to eliminate. Non-native species can be accidentally introduced by recreational boaters when caught on propellers, in intakes and attached to hulls. Unused live bait dumped into the water can also introduce invaders. To avoid the introduction of these non-native aquatic species in the Delta, boaters are being asked to "Clean, Drain and Dry" their boats. Specifically:

prain livewells, bilge water and transom wells before leaving the area where you used your boat.

Flush water through your boat motor's cooling system and other parts of the boat that normally get wet. If possible, let everything dry for five days in the hot sun before using your boat in another body of water.

After leaving the water, inspect your boat and boat accessories, and dispose of any residues you find by placing them in the garbage bin. Wash your boat, tackle, downriggers and trailer

Empty bait buckets on land, never into the water. Never dip your bait or minnow bucket into a lake if it contains water from another lake. Never dump live fish or other organisms from one body of water into another one.

Report sightings of invasive species toll-free to:

CARBON MONOXIDE

Carbon monoxide is a colorless, odorless and tasteless gas that, in high concentrations, can be fatal. Carbon monoxide is a by-product of combustion of carbon-based material such as gasoline, natural gas, propane, coal or wood. Common sources of carbon monoxide aboard boats are the main or auxiliary engines, generators, cooking ranges, space heaters and water heaters.

Carbon monoxide can collect aboard boats in a variety of ways:

Exhaust leaks Improperly vented appliances

Entry of exhaust into enclosed areas, most commonly due to mooring too close to a dock or another boat that obstructs the exhaust port

back drafts The Department of Boating and Waterways (DBW) warns all boaters that carbon monoxide poisoning is an extremely dangerous matter that can result in serious injury or death. DBW also advises all boaters to ensure that exhaust systems are maintained, appliances and accommodation spaces are vented, swimming areas are monitored and carbon monoxide detectors are installed in

accommodation spaces. It is unlawful for boaters to ride on the swim

platform or to participate in "teak surfing" or "platform dragging."

Entry into cabin compartments by prevailing wind conditions or

the event of an emergency or injury for your own safety and the safety of your passengers and other boaters who are enjoying the Delta. To learn about the first aid courses offered by the American Red Cross, please contact American Red Cross Sierra-Delta Chapter (916) 993-7070 or visit www.redcross.org/ca/sacramento

It is recommended that every boater take an American Red Cross or

other approved first aid course. It is important to know what to do in

Equip your boat with a first aid kit that contains, at a minimum, the following first aid supplies:

+ Adhesive bandages in various sizes

+ Rolled bandages (1 and 3 inches)

+ Aspirin or non-aspirin pain relievers

+ Motion sickness medication or patches

+ Fingertip bandages

+ Triangular bandages

Medical adhesive tape

+ Scissors and tweezers

+ Germicidal hand wipes

Butterfly closures

+ Eyewash cup

+ Sterile eye pad

+ Cold compress

First aid guide

+ Calamine lotion

+ Antibiotic ointment

Sterile pads

Antiseptic

Gloves

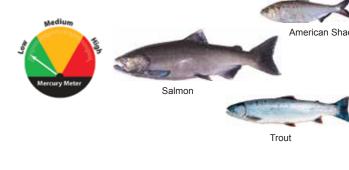

SAFER FISH CONSUMPTION

Eating fish is good for your health, but some fish caught in the Delta, including striped bass, contain high levels of mercury. Mercury can negatively affect how the brain develops in unborn babies and children. Therefore, women 18-45, especially those who are pregnant, and children 1-17 should limit their consumption of high mercury fish

For detailed advice on more Delta fish for consumers of all ages, go to www.oehha.ca.gov/fish/so_cal/index.html or call (916) 327-7319 (Sacramento) or (510) 622-3170 (Oakland). Safer fish from the Delta include salmon, trout, and American shad. These fish are both low in mercury and high in healthy "omega-3 fatty acids."

BOATING SAFETY

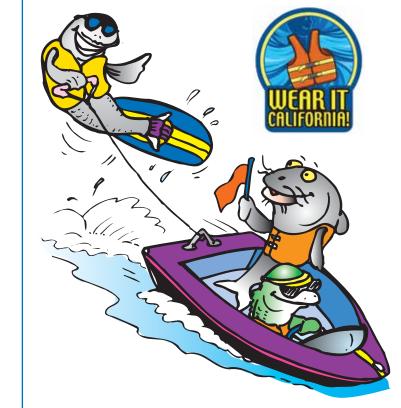

Educate Yourself About Safe Boating

safety visit BoatSmarter.com or call (888) 326-2822

The California State Parks Division of Boating and Waterways (DBW) ramps, boat shows and events. offers a free California Boating Safety Course that consists of an optional exam that may be completed and mailed to the DBW for a Certificate of Completion.

For a complete list of other boating safety courses and classes, visit www.dbw.ca.gov/BoaterInfo/BSCourses.aspx. To learn more about California's boating laws and/or general boating

When using a boat to tow a person on water skis or an aquaplane (such as a wake board, knee board or inner tube), there must be, in addition to the operator, one other person in the boat who can observe the person being towed. The observer must be at least 12 years of age.

Any person being towed behind a vessel must wear a Coast Guard-approved Type I. II. III or V life jacket. (Check the label on the inside of the life jacket for approved activities.) See the life jacket section in this map for examples. Towing water-skiers after sunset or before sunrise is prohibited by

Water Ski Flag: It is mandatory for the operator of a vessel involved in towing a skier to display a red or orange water ski flag (a square or rectangle, at least 12 inches on each side), to indicate: A downed skier • A skier in the water preparing to ski

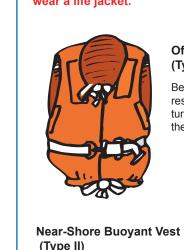

Nater skis and aquaplanes must not be operated in a manner which

 A ski line extended from the vessel • A ski in the water in the vicinity of the vessel

endangers the safety of persons or property.

LIFE JACKETS

Children under the age of 13 are now required to wear a life jacket.

Best in open, rough or remote water where rescue may be slow. Type I's float you best, turn most unconscious wearers face up in the water and are highly visible.

Off-Shore Life Jacket

Good in calm, inland water, or where there

is a good chance of fast rescue. Less bulk. Type II's will turn many, but not all, unconscious wearers face up in the water, but Type II's are not suitable for long hours in rough water.

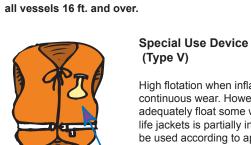

is a good chance of fast rescue. Generally the most comfortable life jackets. Type III's are not good for use in rough water and the wearer may have to tilt head back to avoid face-down position in water Recommended for water skiing.

(Type IV)

Throwable Device

Use in calm, inland water with heavy boat traffic where help is always nearby. Type IV's do not help unconscious persons, and are not designed for non-swimmers or children. Type IV's are not suitable for many hours in rough water. NOT approved for water skiing. Required to be immediately available on

High flotation when inflated. Good for continuous wear. However, may not

adequately float some wearers unless this life jackets is partially inflated. Type V's must be used according to approved conditions listed on the label. Type V's should not be worn during high

speed activities unless tested for those

Not all Type V life jackets are inflatable. Accidents happen too fast to reach for a life jacket.

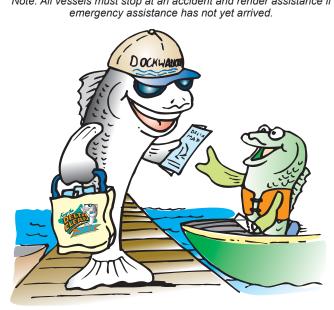

5 M.P.H. ZONES

Limit your speed to 5 M.P.H. when your motorized vessel is: 100 feet from a bather (but not a water skier) 200 feet from a bathing beach, swimming float, diving platform, passenger landing being used, or a landing where boats are tied up Anytime you see a sheriff's emergency blue lights

emember to always wear one. Visit www.WearltCalifornia.com

to find out how to select a life jacket.

Note: All vessels must stop at an accident and render assistance it emergency assistance has not yet arrived.

What are DOCKWALKERS? Dockwalkers are volunteers who train boaters and other recreators about environmentally sound boating practices. Dockwalkers distribute educational materials while visiting marinas, boat launch

27, **28** & **86** - Stockton Marine Operator - upriver from Pittsburg

is important to know the difference, as the two are not the same. Most newer radios

have both the international and U.S. channels, so pay attention to your radio settings.

For special assistance with information on GPS, DGPS Loran-C and navigation rules,
