Appendix D Commercial and Institutional Survey

D. Commercial and Institutional Survey

The commercial and institutional survey of organizations involved in nonmotorized boating was intended to identify the number and types of non-motorized boats owned by these organizations, as well as the number of participants, and costs of participation. In addition, the survey included several questions about observed trends in non-motorized boating, facility needs, and safety issues. We conducted the survey between November 2006 and May 2007.

This appendix provides a description of the survey approach, and the following:

- **Exhibit D.1,** a paper version of the survey
- **Exhibit D.2,** a summary of the results of eleven survey questions
- **Exhibit D.3,** a summary of participation and expenditure results by region
- **Exhibit D.4,** a summary of boats and boat types
- **Exhibit D.5,** a listing of 243 commercial and institutional entities providing non-motorized boating rental, instruction, and/or guided trips
- **Exhibit D.6,** a summary of commercial whitewater participation on eleven California rivers.

Survey Approach

There were two initial tasks for this survey. The first task was to identify entities to be surveyed, and the second task was to develop the survey instrument. We developed a list of commercial entities that provided non-motorized boating services through directories, Internet research, and lists of outfitters provided by government agencies. DBW provided a list of aquatic centers to be surveyed, many of which offer nonmotorized boating activities. We reviewed web pages, and obtained addresses, telephone numbers, and emails for a final list of 243 organizations. We removed many companies that were initially identified on various lists, because they were no longer in business (particularly windsurfing businesses). We removed a number of entities from the lists, because they were retail-only and did not provide non-motorized boating services. The final list of 243 commercial and institutional entities includes the vast majority of all non-motorized boating service providers, and ten (10) yacht clubs that we contacted regarding small sailboats. We incorporated small sailboat information from yacht clubs into club boating results. This overall list is likely missing some small rental businesses. NewPoint Group implemented the survey by telephone, mail, and email. We contacted all 243 entities multiple times, by both telephone and email. Respondents were given the option of completing the survey over the telephone, or being sent the survey (email or postal mail) to complete and return. We made up to four contacts with entities that did not respond, and had a final response rate of 46 percent, 112 completed surveys. For the 131 entities that did not complete surveys^a, we conducted additional Internet research to identify the region in which they were located, the type of services they provided (rental, instruction, guided trips), and the average cost of each type of service. These region and service-specific extrapolations are reflected in the participation and expenditure data provided in Exhibit D.3, and used in the economic analysis in Section 4 of this report. Similarly, in Exhibit D.4, the number of boats, by boat type, for commercial and institutional entities, are based on the number of boats by type for the 112 survey respondents, extrapolated to the entire population.

^a Analysis of the survey responses was done confidentially, with no organization identification on the compiled surveys (unless provided by the respondent). However, we separately kept track of which of the 243 entities completed surveys. This allowed us to re-contact those that had not completed surveys, and finally, to research non-respondents so that we could accurately extrapolate participation and expenditures to the full population.

Non-Motorized Boating in California Commercial and Institutional Rentals, Instruction, and Guided-Trips Survey

Questionnaire

BACKGROUND

The California Department of Boating and Waterways (Cal Boating) is conducting its first ever study of non-motorized boating in California.

As non-motorized boating activities have become increasingly popular in California and elsewhere, Cal Boating is considering providing more support to this growing boating community. As a first step in further planning and potential support for non-motorized boating, Cal Boating seeks to understand how many non-motorized boats and boaters there are in California, the types of non-motorized boats, and where they are used.

The results of this study will be used to help Cal Boating to: (1) understand how economically important non-motorized boating is to California; and (2) potentially ultimately plan future facilities to meet the needs of non-motorized boaters. This study is **not** associated with California Department of Motor Vehicles boat registration enforcement.

Relatively little is known either nationally, or within California, about non-motorized boats and boating, and we need non-motorized boaters' input. Those businesses and organizations that are involved with non-motorized boating may have a good awareness of facility needs, and perspective on how to improve non-motorized boating in California. In order to determine the number of non-motorized boats in California, and the economic impact of non-motorized boating, we need to know not only about private-owner boating, but also about participation in non-motorized boating rentals, classes, and guided trips. The focus of this survey is to gather information about these three categories of non-motorized boating activities.

As part of this overall study, we are conducting three surveys: (1) a statewide random survey of individuals that own one, or more, non-motorized boats; (2) an Internet survey of active-users of non-motorized boats; and (3) this email and telephone survey of commercial, non-profit, and institutional non-motorized boating service providers.

DIRECTIONS

Please complete this survey if your business or organization provides one or more of the following: (1) rentals, (2) on-the water classes or instruction, and/or (3) guided trips, for any non-motorized boat types, as defined below. If you have multiple office or store locations, please complete a separate survey for each location.

All of your responses will be kept strictly confidential, and will only be presented in the aggregate form, together with other responses. The results of this study will be available late 2007 at the California Department of Boating and Waterways web page, <u>http://www.dbw.ca.gov</u>.

The survey is divided into five sections. Everyone should complete SECTIONS 1 and 5. Complete SECTION 2 if you provide rentals, SECTION 3 if you provide on-the-water classes or instruction, and SECTION 4 if you provide guided trips.

For purposes of this study, "non-motorized boat" is defined as: any boat not currently registered with a vessel registration (CF) number from the California Department of Motor Vehicles. This non-motorized boat definition includes: (1) boats propelled by paddles or oars (and usually without a motor), such as canoes, kayaks, inflatable boats and rafts, rowing boats (including row boats, shells, sculls, dories, driftboats, and tenders), and other types of manually propelled boats; (2) small sailboats 8 feet in length or shorter (and usually without a motor); and (3) sailboards and kiteboards. Non-motorized boats include "toy like" boars include other non-durable water toy, nor do non-motorized boats include innertubes or fisherman float tubes. Finally, non-motorized boats do not include normal surfboards, beach boagie boards, or river boards.

	ections and clarifications are provided in bold type. Thank you in advance for your time. If you have any questions, use call or email Wendy Pratt at (916) 442-9227, or <u>wendypratt@newpointgroup.com</u> .
SE	CTION 1 – TO BE COMPLETED BY ALL RESPONDENTS
1.	Please identify your type of business entity or organization. (Indicate all that apply) Commercial business Non-profit organization Institutional organization (school, university)
	 □ 4 Local government □ 5 Private boating club □ 6 Aquatic center □ 7 Self-employed guide or instructor □ 8 Other: 9
2.	How many years has your business or entity provided services and/or products related to non-motorized boats? 10
3.	How many non-motorized boating-related business office or store locations does your entity or organization have in California? 11 If you have more than one California location, enter the county of one location in question #4, and complete the survey for that location. Please complete a separate survey for each business office or store location.
4.	What is the county in which your business/entity office or store is located? 12
5.	Are non-motorized boating-related services or products your primary business or organizational focus?
6.	If no, what is the primary business or organizational focus? (Indicate one)
	 I to Outdoor or retail sporting goods, in general I to Scuba diving, fishing, or hunting services I to Boating education
	19 Recreational activities, in general 20 Other: (please specify) 21
mot	estion #7 will help us identify how many non-motorized boats are in California. Please identify each type of non- torized boat for which your organization has any number of rental, instructional, or guided-trip boats, and the nber of boats of that type. You may use the "Other" category if your specific boat type is not identified.
7.	Please identify the specific type of non-motorized boat, and total number of that type of boat in your fleet of rental, instructional, and/or guided-trip non-motorized boats in 2006. Do not include boats within your retail sales inventory (unless they are also used for rental, instruction, or guided trips). (Indicate all that apply)
