

Help Keep California Waterways Clean!

USE PUMPOUTS AND DUMP STATIONS

- It is **illegal** to discharge raw sewage into California waters.
- All boats with an installed toilet must have a Coast Guard-approved Marine Sanitation Device (MSD) if operating in US navigable waters.
- Visit a marina with a sewage pumpout  and/or port-a-potty dump station to properly dispose of sewage. Call **1-800-CLEANUP** or visit www.dbw.ca.gov or www.earth911.org to find sewage pumpout locations near you.
- Read the labels and look for holding tank disinfectants and deodorizers that do not contain chlorine, formaldehyde or other components that can be harmful to aquatic organisms.
- Keep the "Y" valve properly secured in a closed position to prevent accidental discharges (use a padlock or wire tie).
- It is illegal to discharge wastes, treated or not, into a federally designated No Discharge Zone. Your MSD must be connected to a holding tank or secured to prevent all sewage discharges. No Discharge Areas in California are:

Los Angeles County:

Avalon Bay Harbor

Orange County:

Huntington Harbor

Sunset Bay

Upper and Lower Newport Bay

Dana Point Harbor

San Diego County:

Oceanside Harbor

San Diego Bay

Mission Bay

Ventura County:

Channel Islands Harbor

Placer & El Dorado Counties:

Lake Tahoe

Marin County:

Richardson Bay
