The Life of Citrus Trail

Pollinators, Pests, The Navel Orange, Legacies of the Land, Wildlife

Use our custom app to explore the park, or just use your smartphone camera and web browser to enjoy the hunt as well!

California Citrus State Historic Park is celebrating 25 years of preserving the rapidly vanishing cultural landscape of Southern California's citrus industry by being home to nearly 200 acres of working citrus groves.

Through engaging interpretive programs, the park is committed to educating visitors about the contributions of the diverse groups of people that shaped the region's development through their involvement in the citrus industry, as well as exploring the environmental impacts of this industry and how it has changed the landscape over time.

This exciting digital scavenger hunt is generously supported by the Friends of California Citrus Park, a non-profit management corporation. For more information on how to support this organization, visit californiacitruspark.com.

California Citrus State Historic Park is located at: 9400 Dufferin Ave, Riverside, CA 92504
For more information on park hours and operations, please visit parks.ca.gov/calcitrus
