Activities/Games	17-9
Background Information	17-10
Vocabulary	17-15
Suggested Resources	17-15
Appendix D: Sample Press Releases	17-17

Acknowledgements

First and Second Editions

This handbook was originally compiled and edited by Christina Meads and Jennifer Turner, under the supervision of Donna Pozzi and Bruce Thomsen. We would like to acknowledge and thank the many people who generously contributed their time, knowledge, and expertise to this project (please note that a number of years have passed since this handbook was first produced, so many of these individuals are no longer working for California State Parks or are with other divisions of the Department):

The Junior Ranger Advisory Committee (Jim Fife, Val Nixon, Donna Pozzi, Stephanie Price, Rich Silver, and Kathryn Yee), who met in 1990 and 1991 to compile the first handbook (from which the current handbook was developed); the late Stacey French met with us many times and provided helpful resource materials, fun activities and interpretation ideas, and an Animal Life program; Wendy Harrison contributed a Plant Life program, activities, ideas on how to work with children, and effective methods of interpretation; Joy Meads volunteered to proofread and edit the entire handbook; Val Nixon carefully edited the first draft of the handbook and contributed valuable suggestions and information, particularly for the Geology section; Rita Nunes sent helpful information from Indian Grinding Rock State Historic Park and advised us on the California Indians section; Stephanie Price took the time to create a sample history and water program and sent fun activities to go with them; Laurel Rayburn provided the background information and program for the Energy section; Charles Smith, Native Californian Concow/Maidu, gave ideas for the California Indians section and edited it for accuracy; Tom Tanner provided valuable information on Native Californians, both by interview and by the loan of excellent books on the subject; Kathy Yee drove from San Francisco to Sacramento to edit an early draft of the handbook, and sent a box full of helpful reference books; Cara O'Brien and Joanie Cahill created the Junior Ranger Adventure Guide.

Special thanks to the following two people, who generously spent many hours of their time helping us and who went above and beyond the call of duty: Mary Helmich edited and proofread the entire handbook, standardized and greatly improved the graphic design, and contributed in countless ways to the improvement of the history section; John Werminski was always available to provide advice and information from the earliest stages to the end—he spent hours editing the entire handbook in two revisions and contributed his expertise in natural history and interpretation.

Third Edition

The latest edition of this handbook is the product of the hard work of a number of additional individuals. Heather McCummins contributed many, many hours of time in formatting the handbook, bringing consistency to its look and “voice,” and

researching and writing information needed to bring the handbook up to date. She was supervised in this work by Jenan Saunders, Donna Pozzi, and John Werminski. Additional people who assisted with the review of the handbook and recommended changes include: Carol Cullens of the Interpretive Publications Section; Alex Peabody, Aquatic Safety Specialist, and Jim Fitzpatrick of the Public Safety Division; Kathy Lindahl, Paulette Hennum, Leo Carpenter, and Cuauhtemoc of the Archaeology, History & Museums Division; and Janet Didion, Cynthia Roye, and Syd Brown of the Natural Resources Division. We would also like to thank graphic designers Gail Dudding, Laurena Cabañero, and Jane Howard for their work on the graphics used in many of the handbook's activities and the handbook cover.
